

Seminar 10 for Lecture 9

April 9, 2015

1 Question 1:

Which of the following are good questions to ask oneself, in order to build quality in a software system?

- **1** *Is the customer the same as the user?*
- **2** *How much can my customers can afford to pay for my product?*
- **3** *Can I reduce the user roles even more, to reach a minimum number of user profiles?*

a) 1, 2

b) 1, 3

c) 2, 3

d) 1, 2, 3

Answer: a. 1, 2

1. Is the customer the same as the user.

2. How much can my customers can afford to pay for my product

2 Question 2:

Which of the following factors have most influence in determining the testing process?

- a) *The tools used to report and fix bugs*
- b) *Product interfaces, project size*
- c) *The teams's attitude in communicating software faults and failures*
- d) *Regular bug triage meetings*

Answer: b. Product interfaces, project size

3 Question 3:

What is the definition of heuristics?

- a) *The portfolio of tools used in test managment?*
- b) *Problem reporting and solving skills.*
- c) *Experience-based techniques for problem solving, that give a solution which is guaranteed to be optimal.*
- d) *Experience-based techniques for problem solving, learning, and discovery that give a solution which is not guaranteed to be optimal*

Answer: d Experience-based techniques for problem solving, learning, and discovery that give a solution which is not guaranteed to be optimal

4 Question 4:

Which of the following will be verified by testers, during the exploratory testing sessions?

- 1) *Program features*
- 2) *Program data*
- 3) *Program interoperability*
- 4) *Project management*
- 5) *Step-by-step test scenarios*
- a) 5
- b) 1, 2, 3
- c) 3, 4
- d) 1, 2, 3, 4, 5

Answer: b. 1, 2, 3
