

Table 1

Test case id:	1
Test subcase id:	a
Unit to test:	Create account
Priority:	
Initial state:	"Username" is unique, "Password" is good
Test data:	
Steps to be executed:	1) Go to en.wikipedia.org/wiki/Main_Page
	2) Click top-right "Create account"
	3) Fill "Username" field: husven
	4) Fill "Password" field: 123Project2
	5) Fill "Confirm password" field: same input as in 4)
	6) Fill "Email address" field: (empty)
	7) Interpret captcha and fill "Security check" field accordingly
	8) Click "Create your account" button
Expected result:	User creation confirmed and automatic login
Actual result:	Account creation error / Cannot create account: The requested username is already taken by a user on another wiki.
Pass/Fail:	FAIL
Comment:	The account creation failed as the desired username was taken already.
#####	
Test case id:	1
Test subcase id:	b
Unit to test:	Create account
Priority:	
Initial state:	"Username" is unique, "Password" is good
Test data:	
Steps to be executed:	1) Go to en.wikipedia.org/wiki/Main_Page
	2) Click top-right "Create account"
	3) Fill "Username" field: husven_test3
	4) Fill "Password" field: 123Project2
	5) Fill "Confirm password" field: same input as in 4)
	6) Fill "Email address" field: (empty)
	7) Interpret captcha and fill "Security check" field accordingly
	8) Click "Create your account" button
Expected result:	User creation confirmed and automatic login
Actual result:	Account created and redirect to main page logged in with pop-up «Help Improve Wikipedia»
Pass/Fail:	PASS
Comment:	All good.
#####	
Test case id:	2
Test subcase id:	a
Unit to test:	Login
Priority:	High
Initial state:	Main page loaded, user not logged in
Test data:	username = husven_test3; password = "INVALID"
Steps to be executed:	1) Go to en.wikipedia.org/wiki/Main_Page
	2) Click top-right "Login"
	3) Fill "Username" field
	4) Fill "Password" field
	5) Leave unchecked "Keep me logged in" checkbox
	6) Click "Login" button
Expected result:	Login fail and keep user on login page
Actual result:	Login fail and keep user on login page
Pass/Fail:	PASS
Comment:	The correct username and the wrong password is supplied. This would keep the user on a special page (login page) of Wikipedia.
#####	
Test case id:	2
Test subcase id:	b
Unit to test:	Login
Priority:	High
Initial state:	Main page loaded, user not logged in
Test data:	username = husven_test3; password = 123Project2
Steps to be executed:	1) Go to en.wikipedia.org/wiki/Main_Page
	2) Click top-right "Login"
	3) Fill "Username" field
	4) Fill "Password" field
	5) Leave unchecked "Keep me logged in" checkbox
	6) Click "Login" button
Expected result:	Login fail and keep user on login page
Actual result:	Login fail and keep user on login page
Pass/Fail:	PASS
Comment:	The correct username and the correct password is supplied. This should take the user to the main page of Wikipedia.
#####	
Test case id:	3
Test subcase id:	a
Unit to test:	Preferences: Change interface language from English to Norwegian
Priority:	Medium
Initial state:	Main page loaded, user logged in
Test data:	
Steps to be executed:	1) Click top-right «Preferences» button
	2) Select «nb - norsk bokmål» under Internationalisation > Language

Actual result:	Date/time format changed into ISO 8601 standard
Pass/Fail:	PASS
Comment:	All good.
#####	
Test case id:	3
Test subcase id:	e
Unit to test:	Preferences: Provide an email address
Priority:	Low
Initial state:	Preferences page loaded, user logged in, email not provided
Test data:	email, password
Steps to be executed:	1) Click "User profile" tab
	2) Click "Set an email address" under "Email options"
	3) Enter email address in "New email address" field
	4) Enter password in "Your Wikipedia password" field
	5) Click "Change email" button
	6) Verify that "A confirmation email has been sent to the specified email address." says on the screen
Expected result:	Message that confirmation email has been sent appears
Actual result:	Message that confirmation email has been sent appears
Pass/Fail:	PASS
Comment:	All good.
#####	
Test case id:	3
Test subcase id:	f
Unit to test:	Preferences: Change password
Priority:	High
Initial state:	Preferences page loaded, user logged in
Test data:	email, old password, new password
Steps to be executed:	1) Click "User profile" tab
	2) Click "Change password" under "Basic information"
	3) Enter '123Project2' in old password field
	4) Enter '123Project21' in new password field
	5) Enter '123Project21' in reenter new password field
	6) Click "Change password" button
	7) Verify that message "Your password has been changed successfully!" appears
Expected result:	Message that password has been changed
Actual result:	Message that password has been changed
Pass/Fail:	PASS
Comment:	All good.
#####	
Test case id:	4
Test subcase id:	a
Unit to test:	Logout
Priority:	High
Initial state:	User logged in
Test data:	
Steps to be executed:	1) Click top-right "Log out" link
	2) Verify that message "You are now logged out." appears
Expected result:	Message that user has been logged out
Actual result:	Message that user has been logged out
Pass/Fail:	PASS
Comment:	All good.
